Why aren't referrer logs available with my account?

If referrer logs are not available for your account, this can mean one of two things:
1. It could mean that you have an Intro account which does not include referrer logs.
2. It could also mean that you have a Basic account or higher but have not requested to have referrer logs available.
Please E-Mail support@lexiconn.com if your account-type includes referrer log access and you would like it enabled.
