Overview of FrontPage

FrontPage is a 'What You See Is What You Get' (WYSIWYG) editor which allows you to visually edit the lay out, graphics and text of your web site as well as edit the HTML code by hand. Once you have designed your pages, you can use its built-in feature to connect to our servers and have them published to your web site. This is done by requesting to have FrontPage extensions installed on your account which can be done at no additional cost.
