How do I upgrade my ShopSite store to the latest version?

First, visit <http://www.lexiconn.com/ecommerce/shopsite/index.html> for information on the most current version of ShopSite. To find out what version of ShopSite you are currently running, look at the bottom of the page when you login to your back office.

On this page you will find a link to our ShopSite upgrade form (Upgrade to ShopSite version x.x.x). If you lease ShopSite, we can upgrade your your site to the most current version at no charge--just select the 'Monthly Lease (free)' option for 'Payment Method' and leave the payment information blank. If you own a ShopSite license, pricing information on upgrades is provided.

Alternatively, you can email us at support@lexiconn.com and we will send you details on how we can upgrade your ShopSite store.

The upgrade process is seamless, it will not alter or conflict with any custom templates you may have, and will result in no downtime.
