Deleting expired coupons from ShopSite

$(function(){ $(".Box").css("display","none"); }); Periodically, you may want to delete old expired coupons from ShopSite. If you are using the customer loyalty coupon module, you may have 100's or 1000's of coupons created, and they will expire if not used after one year by default.

1. In the ShopSite backoffice, go to: Merchandising -> Coupons
2. Select Expired from the dropdown box and click "Search". This will list all expired coupons. You can highlight as many as you want and click "Delete" to remove them from ShopSite.
