My Permalinks are not working in WordPress?

If you enable "pretty" permalinks in WordPress, you also have to put a .htaccess file in place in the wordpress folder for these SEO friendly URLs to work correctly.
If your wordpress blog is installed in the "blog" sub-directory for example, the .htaccess file would contain:
BEGIN WordPress <IfModule mod_rewrite.c> RewriteEngine On RewriteBase /blog/ RewriteCond %{REQUEST_FILENAME} !-f RewriteCond %{REQUEST_FILENAME} !-d RewriteRule . /blog/index.php [L] </IfModule> # END WordPress
