Changing a Shipping Option Name

$(function(){ $(".Box").css("display","none"); }); To rename a shipping option, select the shipping options from the "Shipping Tables" (left) pane of the application, then select "Edit Table Properties" from the "Shipping Options" menu.

This will open the following window:

Enter your new shipping option name in the "Option Name" box, then click the "Save" button (you may also edit the "Restriction Type" from this dialog).
Please note that for maximum flexibility, the application allows multiple tables with the same shipping option name, so you will need to be careful not to create tables with duplicate names accidentally, otherwise the customer may receive two shipping options with the same name but with different shipping costs.
