How do I change my order number in ShopSite?

`$(function(){ $(".Box").css("display","none"); });` ShopSite order numbers can be set to begin at any number, but must contain only numerals. Since ShopSite permissions prohibit you from editing the file directly, we would have to make the change for you.

If you would like to change your order numbers, email us at support@lexiconn.com and let us know the number you would like to begin using for your next order.
